

Don't Let Your Business Die of Ignorance

**Friday 12 September 2008-
Kingston Park, Newcastle**

**Monday 29 September 2008 -
Hardwick Hall Hotel, Sedgefield**

The REACH (Registration, Evaluation, Authorisation and restriction of Chemicals) Regulations are now in place across Europe. Anyone, from any business sector, who is involved in manufacturing, importing or using chemicals and products containing chemicals, will be affected by these regulations. Your business needs to understand the implications of these regulations, and put in place steps to ensure that their statutory obligations will be met.

NEPIC, in partnership with their business support partners, is running two seminars in the region that are aimed at all companies whether part of the Chemical Industry or not and are affected by these regulations. This is an opportunity to hear from the Competent Authority on REACH (HSE) about the registration process, and to learn from other businesses about how they have approached this major business issue.

Format of Event

Registration & Networking
Keynote Address by Fiona Hall MEP
Introduction to REACH and your Obligations
